Ringwood Pedestrian and Bicycle Overcrossing Construction to Begin in Menlo Park

Menlo Park – Caltrans is planning to begin construction on the Ringwood Overcrossing in Menlo Park on August 15, 2011, from 8:00 a.m. to 5:00 p.m. Monday through Friday.

Contractors will start with clearing and grubbing vegetation on the east and west side frontage roads. (Pierce Street & Van Buren Street).

The new Ringwood Overcrossing will include ADA (American Disabilities Act) compliant ramps on both sides that are also more bicycle friendly and will provide safe access to the Overcrossing. The access points will be moved away from the community, onto the freeway side of the frontage roads. The frontage roads on both sides of the entrances will include a new sidewalk, new paving and new landscaping.

During construction hours there will be one-way traffic control on the east and west frontage roads (Pierce Street & Van Buren Street). For some construction activities, the frontage roads may need to be closed **completely** for no longer than 8-hour periods. Detours will be provided.

Residents will be notified 72-hours prior to any full street closures.

Caltrans appreciates your patience and understanding during these construction activities and will work diligently to minimize any inconvenience.

This work is part of the U.S. 101 Auxiliary Lane Widening Project from the Marsh Road interchange to the University Avenue interchange in San Mateo County; this portion is scheduled for completion by March 2012. All work is weather dependent.
