Project

Lifesaver

How Project Lifesaver Works?

Project Lifesaver relies on radio technology and specially trained Sheriff's Officers. Clients that are enrolled in the Project Lifesaver program wear a personalized wristband that emits a tracking signal. This one-ounce battery operated radio wrist transmitter emits an automatic tracking signal every second, 24 hours a day. Each bracelet has a unique radio frequency. The Sheriff's Office Project Lifesaver Task Force is equipped with special tracking equipment that can receive each radio frequency up to about one mile. In the event that a client becomes missing, the caregiver will immediately call 911 and the task force will be deployed to the client's point last seen.

Who Benefits from the Program?

The Elderly Impacted By:

- Alzheimer's Disease
- Dementia

Children With Developmental Disorders Such As:

- Down Syndrome
- Autism

How can I get this assistance for a loved one?

Contact the Somerset County Office on Aging/NJEASE toll free at 1-888-747-1122 and a Specialist will assist you. Help us to help you!

Project Lifesaver is a joint effort between the Somerset County Sheriff's Office & the County Office on Aging and is supported by the County Board of Chosen Freeholders.

About Alzheimer's Disease

Statistics

- Alzheimer's Disease currently strikes an estimated 4.2 million to 5.8 million Americans
